M1

Identity & Data Least Privilege

ID Identity Fortress

PASSED

🏆 Achievement Unlocked: Eliminator of Shared Credentials — You split the shared login, gave each workload its own identity, and cut its access back to what the job needs.

Control Verification	Live Audit Proof	Result
✓ Shadow Agent Registration	Registered in Agent Registry us-west1 with owner marketing-ops & High risk tier	PASS
✓ Dedicated Service Account	promo-agent-shadow re-pointed to promo-agent-sa@qwiklabs-gcp-03-1fe8acd247b0.iam.gserviceaccount.com	PASS
✓ Agent Identity Splitting	Personalization agent migrated to native AGENT_IDENTITY (SPIFFE principal)	PASS
✓ Least-Privilege Dataset Access	roles/bigquery.admin revoked from shared SA; READER granted on customer_data dataset	PASS
✓ Audit Log Attribution	BigQuery dataset reads explicitly attributed to agent SPIFFE principal in Cloud Logging	PASS
✓ Access Enforcement & Denial	Promo agent executes under promo-agent-sa with 0 BigQuery permissions, returning 0 PII profiles	PASS

Ingress Model Armor Screening

M3

 Model Armor Guard

PASSED

 Achievement Unlocked: Guardian of the Inference Boundary — You put content screening in front of the Price Match Agent and watched it refuse a jailbreak that used to get through.

	Control Verification	Live Audit Proof	Result
✓	Model Armor Gateway Attachment	novasmart-ingress-gateway attached to Price Match Agent clientToAgentConfig	PASS
✓	Service Agent Callout IAM	Both gcp-sa-dep and gcp-sa-aipatform-re hold roles/modelarmor.calloutUser and roles/modelarmor.user	PASS
✓	Adversarial Prompt Screening	Attack A blocked with HTTP 403 / Model Armor content security configuration error	PASS
✓	Legitimate Request Throughput	Normal price match query executed successfully with HTTP 200 and valid reasoning engine decision	PASS
✓	Estate Coverage Scope Boundary	PMA covered at ingress; CPA and MSA A2A paths documented as out of scope	PASS
✓	Template & Policy Integrity	nvst-jailbreak-template intact; zero self-grants on antigravity-sa	PASS
